

SQL Practice Test - Report Card

Student Name	Moksh
Test Name	SQL Practice Test – Level Up Edition
Difficulty	Medium → Medium Hard
Performance Level	Strong Fundamentals
Final Marks	39 / 50

Section-wise Marks

Section	Marks
Theory	7 / 10
Database Setup	8 / 10
Practical Queries	24 / 30
Bonus	+4
Total	39 / 50

Strengths:

- Good understanding of joins and relational logic
- Proper use of GROUP BY and HAVING
- Strong logical thinking in subqueries
- Correct usage of aliases and constraints
- Good relational database design understanding

Areas to Improve:

- LEFT JOIN and RIGHT JOIN understanding
- NULL handling concepts
- Output-focused query interpretation
- Difference between COUNT(*) and COUNT(column)

Overall Feedback:

You are progressing beyond beginner-level SQL and entering intermediate SQL thinking. Your strongest area is logical query writing rather than syntax memorization, which is an important skill in real-world development. Continue practicing joins, subqueries, and relational database concepts regularly.

Result: PASS with Strong Fundamentals
