

ADVANCED SQL REPORT CARD

Student: Moksh Shah

Total Score: 32 / 35

Course: SQL Querying & Database Design

Percentage: 91.4%

Exam Name: Advanced Practice Test
(PracticeDB_V2)

Final Grade: A+

Section-Wise Breakdown

Section	Topic	Score	Max Marks	Performance
Section A	Subjective & Logic	8	10	Excellent
Section B	Practical Challenges	24	25	Outstanding (96%)

Detailed Question Analysis

Section A: Subjective (Theory)

- Q1 (Primary vs Unique Key): 3.0 / 3.0 ★
- Q2 (Deleting Duplicates): 2.0 / 2.0 ★
- Q3 (INTERSECT vs EXCEPT): 0.0 / 2.0 (Missed/Not Attempted)
- Q4 (Foreign Key): 3.0 / 3.0 ★

Section B: Practical Challenges

- Q5 (Constraints & Tables): 5.0 / 5.0 ★
- Q6 (LIKE/LEN Filters): 3.0 / 3.0 ★
- Q7 (Conditional Updates): 3.0 / 3.0 ★
- Q8 (CASE Statements): 3.0 / 4.0 (Missed ELSE block)
- Q9 (GROUP BY & HAVING): 5.0 / 5.0 ★
- Q10 (Cloning & EXCEPT/JOIN): 5.0 / 5.0 ★

Instructor Remarks

Strengths

Your practical SQL execution is phenomenal. You effortlessly handled table creation with multiple complex constraints (PK, FK, DEFAULT, CHECK). Your grasp on filtering,

aggregations (GROUP BY), and utilizing EXCEPT and LEFT JOIN for table comparison is well beyond a beginner level.

Areas for Improvement

- Take a quick look back at your notes on **Set Operators** to review the definitions of INTERSECT (finds common records) and EXCEPT (finds records in query 1 not in query 2).
- When using a CASE WHEN statement, always remember to add an ELSE block at the end to catch any values that don't meet your specified conditions, avoiding unintended NULL outputs.

Final Verdict

A spectacular achievement! You successfully pushed your limits and proved you have a rock-solid foundation in SQL. You are fully prepared to tackle advanced JOINS and Subqueries next.
